

FirstWave

An abstract graphic on a dark blue background. It features a large, solid red circle in the upper right quadrant. A dark blue, wavy shape, resembling a stylized wave or a thick brushstroke, originates from the bottom left and extends towards the red circle, partially overlapping it.

Open-AudIT

**IT Asset Discovery, Compliance
& Vulnerability Management**

Open-AudIT

FirstWave

AI Powered IT Asset Discovery, Compliance & Vulnerability Management

Discover everything on your network with Open-AudIT, a powerful tool built to strengthen compliance, visibility, and security. Its agentless framework enables seamless scheduled audits while the discovery engine captures detailed hardware, software, and configuration data across every device.

Open-AudIT 6 adds AI-driven vulnerability detection using global CVE intelligence, delivering clear insight into security risks and compliance gaps. Enhanced dashboards highlight configuration changes, unauthorized devices, and endpoint security status, helping teams respond quickly and stay audit-ready.

Discover every device

Find every device and track missing devices using automated or on-the-spot network scans.

AI-powered vulnerability detection

Automated detection of vulnerabilities mapped to CVEs. Get direct insights into affected devices and risk severity and compare to historical vulnerability baselines over time.

Security and compliance monitoring

Track compliance against frameworks such as Essential 8, NIST, CIS, and ISO 27001. Identify gaps instantly, receive alerts for critical configuration deviations, and monitor patching, hardening, and software compliance readiness across your environment.

Configuration change management

Track and report on IT asset configuration changes as well as software licensing, shadow IT, and hardware warranty status.

Scheduled reporting

Use the reporting feature to schedule the delivery of reports via email, JSON, CSV, XML, or HTML.

Controlled role-based access

Open-AudIT's user roles have a set of permissions (Create, Read, Update, Delete) for each endpoint. Roles can also be used with LDAP (Active Directory and Open LOAF) authorization.

Configuration and software baselines

The compliance system compares software, hardware, users, and netstat data against your required standard to create easy comparisons of current and expected state.

Antivirus and firewall security

Retrieve the details of installed antivirus or firewalls from Windows clients and build security dashboards to track adherence to compliance requirements.

FEATURES

BUSINESS MANAGEMENT:

CUSTOM NOTIFICATIONS

- Email reports can be filtered by the organization, sending only relevant data.
- Emails can be to one or more contacts.
- Reports/lists can be in CSV, JSON, HTML, and XML formats.
- Email scheduling of any report.

BUSINESS SERVICES

- Open-AuditIT tracks every device on your network, recording changes, additions, or removals.
- Schedule discoveries to ensure all devices are kept up to date.
- Full lists of software, services, disks, open ports, and users are monitored for additions, changes, and removals.
- Schedule IT asset reports to be emailed to you on your schedule and stay ahead of auditors.

USER MANAGEMENT

- RBAC control over devices.
- Custom business hours rules.

PURCHASING:

PRICING AND PURCHASING

- Licensed by the device and not by the quantity of discoveries/audits.
- Fixed license costs.
- MSP Scale licensing available.
- Unlimited user accounts.

SALES AND SUPPORT

- Easy to purchase – just contact us.
- Support portal access.
- Complete documentation and support wiki.
- Pay-as-you-grow options are available.

FLEXIBLE LICENSING

- Open-AuditIT is licensed by the device count.
- There are no limits on the number of discoveries or audits.
- Subscription licensing available.
- Highly scalable architecture.

EASE OF USE:

EASY IMPLEMENTATION

- Easy installation.
- Dependencies are installed automatically.
- Support available for install and customization.
- CSV import and script ready.

ACCESSIBILITY

- Extensive Role-Based Access control mechanisms.
- Accessible from any device.
- Single Sign On (SSO) across all our applications.
- RESTful JSON API & standard CRUD functionality.

EASY TO USE INTERFACE

- The Open-AuditIT home dashboard is ready to go with information.
- Run discoveries/audits on demand or look at historical reports.
- Accessible from any common browser.

NETWORK DEVICE DISCOVERY & AUDIT:

LOCATION MANAGEMENT

- With Open-AuditIT you have the ability to build locations and have devices assigned to a location.
- By adding an address to a location, you can visualize where your assets are on a map.
- If your organization utilizes racks, Open-AuditIT comes with rack management; you can even get a visual of your rack.
- Discover your cloud instances and know where your data is being stored.
- Open-AuditIT uses Organizations to split out assets, if you are a service provider it is built to manage your customer's equipment.

DEVICE DISCOVERY

- Discover all networked devices.
- Discover every server.
- Cloud instances on AWS, Azure, and Google Compute.
- Virtual Machines.
- Even store non-connected devices.

DEVICE AUDITING

- Open-AuditIT will discover everything about your devices and build a comprehensive audit profile for them.
- Hardware auditing on machines such as motherboards, processors, disks, or memory.
- Software auditing including installed software running, services, and file auditing.
- Network auditing including network cards, IP, open ports, and routes.
- Full system details are audited.
- Users and user groups are available for auditing.

IT ASSET MANAGEMENT

- Gives you detailed inventory of your organization's hardware, software, and network assets.
- Open-AuditIT provides information to help cut software licensing and support costs.
- Improves your visibility and control of IT assets.
- Inventory and configuration data can help with recovery from disaster or other unexpected events.

REPORTING

- All reports that are generated can be scheduled and emailed when it is suitable for you.
- Receive weekly reports on hardware changes in the last seven days.
- Receive weekly reports on new software installations in the last seven days.
- Receive weekly reports about devices that haven't been seen in the last seven days.
- Receive weekly reports on newly discovered devices in the last seven days.
- Receive weekly reports on software licensing that is nearing expiration.

SOFTWARE LICENSING

- Open-AuditIT will discover all the installed software on your systems.
- Discover any shadow IT on your network.
- Use Open-AuditIT's license management system to match installed software with purchased licenses.
- Build historical snapshots to easily compare software over time.
- Schedule reports that look for over-subscriptions and get ahead of unexpected large bills.

Ready to level up?

If you need help with taking your cloud email security to the next level, please contact FirstWave and we will be more than happy to help assess your current situation and recommend a solution to help your business.
