

Perfect for small business

Cloud-based protection for endpoint and mobile devices.

In the ongoing battle to defend your business, the endpoint is a favorite target for cyber criminals. This means that it is more important than ever to protect and monitor all endpoints that handle sensitive information and connect to systems both inside and outside the business network.

CyberCision Endpoint Security with Trend Micro is an effective Cloud-native security solution that centralizes next-generation antivirus for all your Windows, macOS and Linux desktops, laptops, and servers, in addition to the leading virtualization systems and Android devices. This complete protection covers all vectors: network (firewall), email, web, and external devices.

Multiple
Platforms

High performance and
minimal device impact

Simple to set up and
manage

A simple, affordable
and effective solution to
secure computers, smart
phones and servers from
advanced malware and
ransomware attacks

Powered by world's leading
cyber security solutions

Endpoint Features

SIMPLE, COMPLETE, TRUSTED

Powered by XGen™ security, Worry-Free Services provides a cross-generational blend of threat defense techniques and connected threat defenses that constantly learns, adapts, and automatically shares intelligence across your environment, giving you detection and response that is:

Simple

- Easy to install, simple to use, and won't slow you down.
- A single, intuitive web console for in-depth visibility and control across your entire organization.
- Manages multiple devices within a single agent.

Complete

- High-fidelity machine learning combined with other state-of-the-art detection techniques gives you the broadest protection against ransomware and advanced attacks.
- Uses a blend of advanced threat protection techniques to eliminate security gaps across any user activity, any endpoint, and any mailbox.

Trusted

- Thanks to our up-to-the-second threat intelligence network, we protect more than 250M endpoints.
- Wards off threats while you focus on your business point, and any mailbox.

FEATURES

Endpoint Security

- Windows and Mac OS support
- Anti-malware and behavior analysis
- Predictive and runtime machine learning
- Vulnerability protection/virtual patching
- Full disk encryption
- Application control
- Integrated endpoint DLP
- Device control

Web Security

- Web reputation and URL filtering

Mobile Security and Management

- Mobile security and management

Benefits

Advanced Protection

- High fidelity machine learning uniquely analyzes files, not only before execution but also during runtime.
- More reliable detection of advanced malware, including fileless, cryptocurrency mining, ransomware, and more.
- Behavioral analysis against scripts, injection, ransomware, memory, and browser attacks.
- Vulnerability protection automatically shields endpoints from known vulnerabilities of Microsoft applications, significantly limits the threat vulnerabilities that can be exploited.

Safeguards your sensitive data

- Integrated DLP, encryption management, and device control capabilities cover the broadest range of devices, applications, and file types to ensure:
 - o Maximum visibility and control
 - o Confidentiality and compliance with GDPR, HIPPA, and other rapidly evolving regulations
 - o Granular policies for device control and data management
 - o Management and visibility for Microsoft® BitLocker®

Stops malicious software with application

- Utilizes application monitoring, whitelisting, and lockdown.
- Blocks unauthorized or unknown applications from executing attacks, like ransomware.
- Enforces easy-to-manage, simple rules.
- Enables you to run only applications you have authorized.
